Index to Book Gs 22-23

Each of the "Gs" volumes use Ahnentafel numbering. To find the father of a person, multiply the index by 2. To find the mother, multiple by 2 and add 1. This will not always work when families have multiple children that are ancestors. Only 1 of the children will be used to number the parents. However, by searching for the parental number in the books, the other children can be found. Each family record identifies the known parents with their associated Ahnentafel number.

Many parents and children are not shown. Many are presented with the families, but not given their own 'family'. Many children are not ancestors. Some details about their lives may be shown, especially if the details involve the other siblings.
